

THE UNIVERSITY *of York*

Communication skills in social work university training

Juliet Koprowska

- An established history of teaching communication skills
- The development of a model for feedback 1998 convincing to others
- A theoretical framework for the learning process derived from attachment theory and systems theory
- Good facilities

Technological developments

- Preparation and introduction to methods
- Time to digest new knowledge before practical sessions
- Formative feedback

Predictability and reliability

- Small groups 4-6
- Stable membership
- Regular place and time
- Same teacher

- Prescriptive approach: decisions about content
- Assessment of both skills and critically reflective analysis
- Evaluation to understand if the process makes a difference

Level 1: Learners' reactions

Student evaluation

Level 2a: Modification in attitudes and perceptions.

Student reflective diaries

Level 2b Acquisition of knowledge and skills

Pre- and post-test assessment tasks; self-rating, actor rating and assessor

Level 3: Changes in behaviour

Pre- and post-test assessment tasks; self-rating, actor rating and assessor

Level 4a: Changes in organisational practice

Not attempted

Level 4b Benefits to users and carers

Questionnaires

Methodology: multiple-measure case study design.

Sample: year 1 undergraduate

Self-efficacy scale

Recorded interview with service user-actor

Self-evaluation of interview

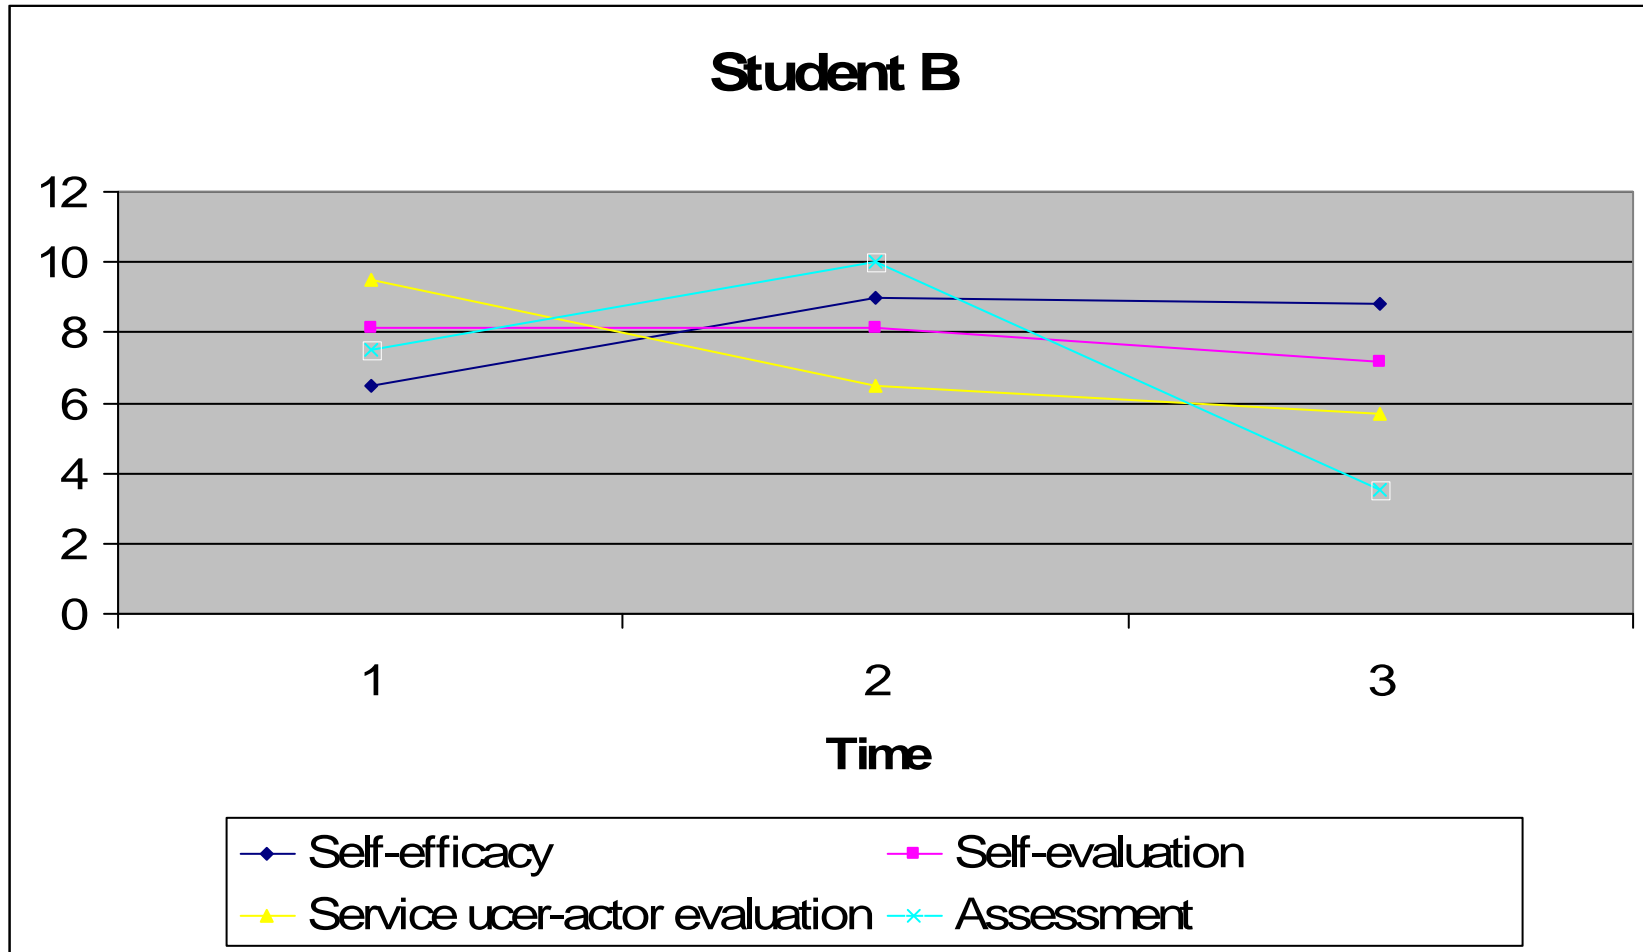

Service user-actor evaluation

Assessment of video-recording

Feedback from service users on placement

T1 = prior to teaching, T2 = 3 months later, after teaching, T3 = 9 months later, after first placement

Students may lose confidence as they acquire knowledge and understanding

Effect of placement hard to disentangle

Feedback from users and carers is sought but not systematically

We still do not know enough about the transfer from the university to the workplace

- Start at the other end of the process:
analysis of how qualified social workers
communicate
- Identify patterns
- Develop teaching and learning
opportunities
- Evaluate effects
